

Breas Apto® F 01

Softness redefined

Thoughtfully designed to provide you with premium softness, a secure fit and comforting ease of use. Helping to support your journey to better sleep and everyday wellness.

Good night. Great morning.

Breas has revolutionised mask cushion technology with a patented endoskeleton design that eliminates the need for hard plastic. Instead, its ultra-soft silicone cushion and flexible wings are designed to seamlessly conform to facial contours while adapting to user movements – supporting restful nights and refreshed mornings!

Premium Softness. Comforting Simplicity.

Innovative mask cushioning is complemented by a flexible frame and soft-touch headgear, working together to support comfort and stability.

Designed to optimise performance throughout the night, it provides a secure seal with minimal adjustment, while remaining intuitive and easy to use.

The Breas Apto mask family – experts in respiratory care.

Breas Medical is a global company headquartered in Sweden, with over 30 years of expertise in respiratory and sleep solutions.

Our solutions cover a broad range of devices, consumables, service solutions, educational and training programs and comprehensive connectivity capabilities to improve the quality of life of patients, from hospital to home.

Soft. Simple. Assured.

Breathable, cushioned headgear that looks and feels comfortable, without sacrificing stability.

Unique, patented endoskeleton avoids hard plastic and uses flexible wings designed to support a secure seal while providing comfort and stability on a range of face shapes and sleeping positions.

Quick-release elbow for quick and easy connection and disconnection. The 360° rotation feature provides freedom to move.

Unrestricted vision and freedom to move. The endoskeleton and the frame are both designed to support freedom to move and unrestricted vision without compromising seal, stability, or comfort.

Flexible frame designed to flex in a way that supports stability and seal.

Easy-on clips
Simple and effective, the glide-on securing clips are easy to locate for a quick fitting experience.
